

Standard Maintenance Contract

STANDARD MAINTENANCE CONTRACT - DETAILED OVERVIEW

Our Standard Maintenance Contract is designed to ensure reliable operation and extended life of your water treatment system through planned, routine care. This plan is ideal for clients seeking cost-effective, scheduled services to maintain consistent system performance.

Services Included:

- Scheduled Maintenance Visits:

Regular service visits conducted on a monthly, quarterly, or customized basis depending on system usage and client preference.

- Cleaning & Flushing Services:

Periodic flushing of membranes, tanks, and piping to reduce fouling and scaling buildup, improving system longevity.

- Basic Calibration & Adjustments:

Inspection and adjustment of key instrumentation such as pressure gauges, flow meters, and conductivity monitors.

- Discounted Spare Parts & Chemicals:

Preferred pricing on standard replacement components, filters, and treatment chemicals.

- Maintenance Log & Reporting:

Comprehensive documentation of each visit, service performed, and system condition reports for client records.

- Filter & Membrane Condition Assessment:

Inspection of cartridge filters, media beds, and membrane elements to identify wear, fouling, or damage.

The Standard Plan is well-suited for commercial and industrial users that require routine upkeep with responsive but non-emergency service support.
